CEV Wildflower Mixtures

All CaroVail’s wildflower mixtures are formulated with 50% sheeps (or hard) fescue. This blend provides the correct balance of flowers with non – competitive nurse grass to give you the best results.

	Size	Rate		Seed Time
New England Wild Flower Mixture	3#	24#/Acre	Contains both annual and perennial species	April / May
New England All – Perennial Mixture	3#	24#/Acre	All – perennial, selected for color and hardiness	April – September
Roadside & Slope Amendment Mix	3#	24#/Acre	An all- perennial mixture that is VERY aggressive	April - September

Custom blending can be done to your specifications. Mixtures can also be designed on color, height, climate, bloom – time, etc. **We will also blend wetland and reclamation grass mixtures to your specs!**
