OF CHILDREN

GENERAL INFORMATION

HUMIC PLUS is a concentrated product of very high solubility that contains humic substances from vegetable origin that increase soil cation exchange capacity and water-holding ability, improving nutrient availability and promoting the growth of healthy populations of beneficial microbial organisms.

PRECAUTIONS

Harmful if swallowed. Avoid contact with skin, eyes, or clothing. In case of contact, immediately flush skin or eyes with water for at least 15 minutes.

HUMIC PLUS is not phytotoxic when used as directed at the recommended rates.

DIRECTIONS FOR USE

HUMIC PLUS can be used on any crop alone or in combination with dry or liquid fertilizers. It can be applied before planting, at planting or at any time after emergence. It can be dissolved and applied to the soil through irrigation or foliar applied, mixed with enough water to obtain thorough foliar coverage.

NOTICE

The statements made on this label are believed to be true and accurate, but because of conditions of use that are beyond our control, Carolina Eastern, Crop Excellence does not make, nor does it authorize any agent or representative to make any warranty, guarantee, or representation, expressed or implied, concerning this material or the use thereof. Neither Carolina Eastern, Crop Excellence nor the seller shall be held responsible in any manner for any personal injury or property damage or loss resulting to the buyer or the other persons from handling, storage, or use of this material, not following the directions. The buyer assumes all risk and liability resulting from improper handling, storage, or use and accepts and uses this material under these conditions.

USE RECOMMENDATIONS

In combination with fertilizers: **HUMIC PLUS** is designed for use in combination with fertilizers for more efficient use and uptake. The recommended rate is 10–60 lbs per acre or 1–3% of any physical blend of fertilizer, whichever is greater. Apply **HUMIC PLUS** ahead of the most critical growth stages of any given crop.

Corn, wheat, and other grains: Apply 10–40 lbs./Ac/season as a single or split application in combination with a complete fertilizer program. Banded or in-furrow applications are preferred.

Soybeans: Apply 10–20 lbs./Ac as a single application, pre-planting broadcast or at planting.

Turf and Ornamentals: Apply 1.25–2.5 lbs/1000 sq ft. in one or multiple applications.

Fruit and Vegetable Crops: Apply 20–60 lbs./Ac/season as a single or split application in combination with a complete fertilizer program. Repeat as needed for optimum performance.

Alfalfa: Broadcast 10–30 lb./Ac for new crop establishment, alone or in combination with dry fertilizer. Repeat maintenance rates of 10–20 lbs/ac.

For fertilizer rates suitable to your geographical area or the maximum allowable non-nutrient application rates per acre, consult a trained soil specialist/Certified Crop Advisor or contact Crop Excellence.
